

Dear Athan Theoharis,

2/7/84

On the chance of some use to you:

Under date of 1/27/84 the FBI disclosed to Jim Lesar three serials of its Leon Jaworski file that had been withheld. Even though all had been disclosed long ago from the incomplete card file I have of FBI file numbers.

I enclose a copy of the first page of Serial 2 to reflect that the 94 files, as I believe I wrote, are not investigative and relate to public relations and the DeLoach (after Nichols) operations.

Jaworski's invitations to Hoover are 94-54120. He invited Hoover to address Texas groups.

But the Texas AG's letter relating to Hoover's interest in his Youth Conference and his and Jaworski's visit with Hoover is Serial 5 in 94-88890.

Yet when earlier Jaworski had addressed an FBI quarterly police conference (Serial 2) that is filed as an admat, 66-9340-45-189.

While I cannot make a definitive statement, based on such four-part numbers I have seen I believe they represent a finer breakdown by or within a file or that in this instance 66-9340 is broken down and this is from the 45th subdivision.

Most records like Serial 2 that I've seen are stamped "Crime Records" rather than "Crime Research," although my recollection may be faulty. In any event, it is obvious that this record has nothing to do with either.

To update you on the FBI/DJ effort to effect a judicial revision of FOIA that can make it difficult if not impossible to use I enclose a copy of a recent letter to a friend who is a reporter.

I am not in a position to solicit their assistance but I believe that the public interest groups will suffer if I fail. I won't, unless I have to pay the \$1,000+ in the end. I'm not in a position to file more suits and want to spend what time I have writing. (By the foregoing I mean I will not suffer personally. I'm merely trying to protect and defend FOIA.)

Best wishes,
